DETAILED ACTION

Claims 12-17, 19-20, 23-24, 26, 32-33, 35-37 and 41-55 are pending.

Interpretation of the claims

1. The claims set forth a sprayable cosmetic compositions as transparent or translucent oil-in-water microemulsions employing O/W polyalkoxylated emulsifiers with a total emulsifier content of less than 20 %, preferably less than 10 %, most preferably less than 8 % by weight. Said microemulsions are made by employing the phase inversion temperature method of making said microemulsion. The examples are exemplary rather than comparative.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

3. Claims 12-17, 19-20, 23-24, 26, 32-33, 35-37 and 41-55 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The scope of the claims is indefinite since in claims 12 and 36, the oil phase is set forth with narrow transitional language, i.e., "consisting essentially of", and further set forth with open transitional language, i.e., "including". Attention is directed to MPEP 2111.03.

Claims 41 and 44 set forth an oil phase "consisting essentially of constituents of low volatility". Claims 42 and 48-50 employ open transitional language, i.e., "comprising" in defining oil phase components. Said narrow transitional language followed by open transitional language renders the scope of the claims indefinite.

Furthermore, the term "low volatility" in claims 41 and 44 is a relative term, which has not been quantitatively defined in the specification.

Response to Arguments

4. Applicant's arguments filed 03 March 2008 have been fully considered but they are not persuasive.
5. Applicants (pages 14 and 15) assert the amendments obviate the rejections under 112.
